STAYMAN WINESAP APPLE ORCHARD IN FULL BLOOM

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

Nursery Certificate 23 (Resident)

THIS IS TO CERTIFY THAT THE NURSERY PREMISES
of ADAMS COUNTY NURSERY AND FRUIT FARMS, H. G. Baugher,
Prop., Aspers, Pa., including 25 acres of stock have been officially inspected
and passed in accordance with the provisions of the Act of April 21, 1937,
P. L. 318.

Permission is hereby granted this nursery to sell, deliver or transport
nursery stock, not including bramble plants, which has been officially in-
spected for the year ending September 30, 1950; provided that a tag on
which an exact copy of this certificate is printed must be attached to each
package, box, bale, truckload or carload lot of nursery stock sold or delivered.

This Certificate does not cover the requirements of any special quar-
antine or regulation promulgated by the Commonwealth or by the United
States Department of Agriculture. Furthermore, this certificate does not
apply to trees obtained from the Commonwealth of Pennsylvania or un-
inspected nursery stock from any source.

A separate certificate for the grower of bramble plants is required.

This certificate is void after September 30, 1950, but may be revoked for cause

Issued at the State Capitol, Harrisburg, Pa., July 1, 1949

A VIEW OF OUR LARGE PACKING HOUSE

Aspers, Pennsylvania

Dear Friends and Customers:

Spring of 1950 is fast approaching and now is the time for the fruit grower to give consideration to the planting of trees. This catalog carries our complete line of nursery stock together with the prices.

You will find listed herein a fine selection of the leading varieties of fruits which are adaptable to your locality. Regardless of whether you plan to plant one tree, a thousand, or more, make your selection from this catalog and mail it to us. Every effort is made to give prompt and courteous service in connection with all orders.

As this is the 45th Anniversary of our nursery, we extend a special invitation to visit us and see the trees we have to offer. In addition, we own and operate approximately 300 acres of orchards, including five farms, all adjoining, 440 acres in all. I am sure you will be gratified for having had the visit. We would also be glad to meet you personally at our booth No. 584, Pennsylvania State Farm Show.

We will look forward to pleasant and profitable business relations.

Yours for a thrifty and productive orchard,
ADAMS COUNTY NURSERY & FRUIT FARMS
• H. G. BAUGHER, Proprietor

REASONS YOU SHOULD BUY THE FINEST FRUIT TREES GROWN

Our fruit trees are grown on the best grade whole root seedlings right here in the leading fruit county of Pennsylvania. In addition the soil is especially prepared in advance to planting the seedlings, thus providing the richest fruit soil available. I supervise the cutting of buds and the best of care is taken to have every variety true to name. My Nursery is inspected every year by State Nursery Inspectors, to see that all nursery stock is clean and healthy. A Certificate of Inspection accompanies all purchases.

This price list contains a list of the best fruits for this latitude and their descriptions are not exaggerated or misleading.

Come to the Nursery, if you can do so, make your selection, and take them with you in your automobile or truck and save 1¢ per tree. Otherwise, we will ship them to you by Express, Freight or Parcel Post, as you may wish.

To reach the Nursery from Harrisburg, take U. S. Route 11 to Carlisle, then route 34 through Mt. Holly Springs and on to Pitzer's Trucking Station and Garage, turn left there and follow hard road through the village of Aspers, Pa., approximately one-half mile to Nursery. From Gettysburg, take Route 34, through Biglerville and on to Pitzer's Trucking Station, turn right. From York, Pa., at west end of city on U. S. 30 turn right on route 234. Follow through East Berlin and Heidlersburg to Adams County Nursery signboard with arrow. Turn right on 334. Follow 334 approximately one mile to another signboard with arrow, turn left. About one mile to nursery.

I have ideal shipping facilities—a large packing-house on a siding of the Reading Railroad. The trees are carefully packed and should reach the purchaser in the best of condition.

The greatest of care is taken to have all trees, etc., true to label. Any proving not so will be replaced or purchase price refunded, upon proper proof. In no case shall my maximum responsibility exceed the original amount paid.

All orders are accepted on the condition that they shall be void should any injury befall the stock from hail, storm, or other causes beyond our control.

Order early and be sure to get the varieties and quantity you want.

Any sales tax, Federal or State that may be imposed on nursery stock should be added to the amount of your order.

PLANTING OF FRUIT TREES

It is a wise thing to choose land that is well-drained because no fruit trees can thrive in a damp, soggy soil. Pear, plum and quince will stand a greater amount of dampness than other fruits, but they are better if they do not have to contend with unfavorable drainage. The best-drained soil is that whose natural elevation conduces to the rapid elimination of surplus water. A gently sloping hillside, free from hollows or swales where late frosts may not linger, affords the best site. Peaches ought to get the highest locations, because there is less danger from late spring frosts on high ground than on low.

If possible, the land should be prepared as for a good crop of grain, although heavy fertilization is not essential if soil is reasonably fertile.

Have the holes dug in the proper places for the trees, large enough to receive the roots comfortably without bending or twisting them. Stake out the orchard in advance to be sure that the holes get dug in the right places.

When the trees arrive from the nursery, open the package and plant them immediately if it is possible. Be very careful to keep the roots covered to prevent their drying out. In planting, set the trees upright near the center of the holes, spread out the roots evenly, and work fine earth in among them, making sure that they are packed in close contact with the soil. If small air-pockets remain about the roots they will extract moisture from them, so injuring them that the trees may die. Do not apply commercial fertilizer or manure to the roots when planting. Any material of this type used should be applied on the top soil after tree is planted.

In setting out young trees, place them a little deeper than they grew in the nursery. The earthmark on the base of the stem is the best guide in this.

If it is impossible to plant the trees immediately, dig them in. To do this, dig a trench, shovel width and depth, and long enough to hold the roots when they are placed side by side upright. Shift fine earth over the roots, and when the trench is half full, soak them with water and pile on the remainder of the earth. In this temporary planting the trees will keep in good condition for a week or two, until you get them planted.

CARE OF FRUIT TREES

Newly planted trees should be well cultivated the first season, to conserve moisture and to keep down weeds and grass. It is not always good economy to intercrop with grass, small fruits, or grain, unless the young trees are making extraordinary strong growth. When the trees are well established, the spaces between the rows may be used for other crops for a few years, until the trees need the space; but while making their initial growth the trees ought not have to compete with other crops for the plant-food in the ground.

One of the most important items in the care of Fruit Trees is to see that they are trained right from the start. Our two-year-old sizes have the heads already formed, with three to five scaffold limbs well arranged along the trunk to support the head. These trees should be cut back, leaving just the scaffold limbs shortened to the point where it is desired to have the head of the tree.

One-year trees, or whips, should be trimmed to smooth, straight stems, cutting them squarely off at the distance from the ground at which it is desired to have them branch. Usually, apples, plums, pears, and cherries are headed a little higher than peaches, which ought to be encouraged to branch as low as possible. The after-pruning is a matter which requires some knowledge of tree-growth and habit, as well as the purpose for which the trees are grown.

OUR GUARANTEE

We guarantee every tree to be as represented in grade and quality and if on arrival you do not find them as we say they are, return them to us securely packed and in good condition within five days and your money will be refunded in full. We give no guarantee as to growth.

PACKING OF NURSERY STOCK

All packing will be done in boxes or bales, thus protecting the roots and trees well in shipping. No charge is made for packing or delivery to railroad at Bendersville Station.

SHIPPING OF NURSERY STOCK

The spring shipment of nursery stock begins about March 15 to April 1, depending on an early or late season. Fall shipments about November 15th. Purchasers are requested to state whether they wish stock shipped by freight or express.

LEADING VARIETIES OF PEACH TREES

Good thrifty one year old trees.

	1-9	10-49	50-99	100-499	500-999	1000 or more

18 to 24 inches60	.45	.35	.25	.20	.15

Different varieties of peaches may be ordered to get quantity price, but no other fruits may be included.

REMEMBER, the Net Cash Price will be 1¢ per tree less than above prices if you call at our nursery for your trees.

These leading varieties of Peach are listed, just as near as possible, in their order of ripening.

GREENSBORO

An early, white-fleshed Peach that ranks high because of its showy fruit and its large, vigorous, healthy, early-bearing, and prolific trees. It is considered one of the best early varieties as it ripens July 10 to 15. Fine market Peach. Not always free from seed. Fine dessert peach.

CUMBERLAND

An excellent white fleshed peach. Fruit large, attractive color. Considered by many growers to be equal or better than Belle of Georgia, ripening a few days earlier than Golden Jubilee.

RARITAN ROSE (N. J. 97)

This variety is a very early, white, freestone peach of good quality ripening 3 to 5 days before Golden Jubilee.

JERSEYLAND (N. J. 135)

A large, firm, yellow-fleshed peach ripening a few days before Golden Jubilee. Ships well. The tree is hardy and comes into bearing early.

GOLDEN JUBILEE

Developed and introduced by the New Jersey Experiment Station. A yellow, early freestone Peach, ripening about three weeks before Elberta, and of good quality. One of the best new varieties.

TRIOGEM (N. J. 70)

A red all over, yellow freestone, ripening about two days later than Golden Jubilee. It is superior to the Golden Jubilee because it is firmer, ripens slowly, ships well, colors much better, peaches on the inside of the tree are well colored, and has high quality. Considered to be one of Best New Jersey introductions.

SUNHIGH (N. J. 82)

A large smooth yellow freestone peach of highest quality introduced by New Jersey Experiment Station in 1938. The flesh is firm, color bright red over an orange ground color. It is the most attractive of any of the newer peaches. Ripens right after Triogem and with Hale Haven. This is a very promising variety.

HALE-HAVEN

Yellow, freestone, large, high red color, firm, good flavor. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. Very hardy in fruit bud and a heavy bearer. Ripens about 2 weeks before Elberta. Hale-Haven is a new variety, being a cross between the famous J. H. Hale and the well known new variety, South Haven, being originated by the Michigan Experimental Station.

SOUTH HAVEN

A large yellow freestone, ripening about ten days before Elberta. A profitable commercial Peach, originating in Michigan.

BELLE OF GEORGIA

Very large Peach with red cheek; flesh white and firm, of excellent flavor; fine shipper. Ripens August 1 to 15.

SULLIVANS ELBERTA

A sport of Elberta ripening earlier. Identical size, color and shipping qualities. Originated in Georgia.

WHITE HALE

A large white freestone peach. Ripens before Elberta.

REDSKIN

A very bud hardy, vigorous tree producing a large, well colored, yellow, freestone peach which has good shipping qualities.

ELBERTA

One of the greatest commercial yellow Peaches known. Good shipper. Tree hardy and good grower. Ripens August 20 to September 1.

J. H. HALE

Yellow; very large in size and globular in shape; skin thick, smooth and without fuzz; flesh deep yellow, fine-grained, firm, of extra quality; good shipper. It ripens a little ahead of the Elberta, and brings highest prices.

SHIPPER'S LATE RED

A large highly colored Peach. Very hardy, yellow fleshed and freestone of good quality. Ripens just after Hale and Elberta.

BRACKETT

A fine yellow freestone Peach. Similar to Elberta, but of better flavor. A good commercial variety. A good shipper. Ripens a week later than Elberta.

AFTERGLO (N. J. 84)

A large high colored yellow freestone peach ripening three to five days after Elberta. Red coloring carries through the flesh, it being especially red about the pit. A variety that appears hardy and worthy of trial.

LATE ELBERTA

(Sometimes called the Rex.) One of the best of the late varieties, ripening about 10 days to two weeks after Elberta. It is of large size, with yellow flesh. Very desirable market Peach.

We invite you to compare ours with any grown.

YELLOW TRANSPARENT

Earliest and best; tender, juicy, sprightly subacid; grows upright; bears when young, making good filler. Ripens July 1 to 15.

LODI

A Transparent type apple of much larger size and more firm. It ripens a few days later than Yellow Transparent, but is large and can be picked with Transparent. It should be interplanted for cross pollination.

WEALTHY

Medium size, round or pointed almost solid red; flesh white, crisp, juicy; bears young. Ripens August 1 to 15.

SUMMER RAMBO

Very large; greenish red, striped, tender, juicy; tree strong grower. Ripens August 15 to September 15.

SMOKEHOUSE

One of the old kinds welcomed in every home. Ripens in September and can be kept in common storage late into the winter.

GRIMES GOLDEN

A good-sized yellow Apple of high quality. Ripens in September; can be kept late into the winter.

JONATHAN

Very red Apple, smooth, of good size and fine quality. Ripens in September; can be kept in common storage late in the winter.

McINTOSH ✓

Bright, deep red; fine quality. Ripens in September and keeps late into the winter in common storage.

YELLOW DELICIOUS

A good variety, resembling the Red Delicious somewhat in shape. Ripens about same time as Grimes Golden.

TURLEY

A beautiful apple resembling Stayman Winesap and of Stayman type. The fruit does not crack. It looks like a good commercial variety.

STAYMAN WINESAP

Large; mostly covered with red; crisp and juicy. Tree a strong grower. Ripens in October and ready for use soon after picking; keeps late into spring.

YORK IMPERIAL

A medium to large winter Apple with yellow skin shaded red; firm, juicy subacid. An excellent canning and shipping Apple and good for export. Ripens in October.

BALDWIN

A fine winter Apple. Succeeds well in the Northeastern States.

ROME BEAUTY

Large, round, winter sort, mottled and mostly covered with red; the flavor and quality are very fine. It is also a good late keeper.

RED ROME (Gallia Beauty)

A very high colored sport of the old Rome Beauty, having all the qualities of this apple plus the advantage of greater color.

RED DELICIOUS

(Sometimes called Starks' Delicious). An excellent winter Apple. Brilliant dark red skin, shading to yellow at the blossom end, and growing somewhat in quince shape; very attractive.

PARADISE (WINTER SWEET)

Large, creamy white, rosy cheeked. One of the best sweet winter varieties.

NORTHERN SPY

Large, red winter Apple; crisp and juicy. Does well in Northern States.

CORTLAND

A cross between McIntosh and Ben Davis, inheriting the good qualities of both parents. It is a beautiful red, larger than McIntosh, and matures a month later; hangs well to the tree. It keeps late in winter.

DOUBLE RED YORK (No Extra Charge)

This is a sport of the regular York Imperial. It colors earlier and produces higher color than the regular York Imperial.

DOUBLE RED DELICIOUS (No Extra Charge)

A much higher colored fruit than the regular Delicious, coloring earlier, similar in every other respect to the regular Delicious.

DOUBLE RED STAYMAN (No Extra Charge)

Similiar to the Stayman Winesap, excepting that it colors earlier and produces fruit of higher color.

RED CRAB

This is an all red crab apple, medium size, fruit very handsome, produces a fine red jelly.

8 year old Yellow Delicious Apple tree in full bearing in one of the orchards of Adams County Nursery and Fruit Farms.

CHERRIES

Prices listed are per tree.

SWEET CHERRY (1 and 2 year trees)	1-9	10-50	50 or more
Extra Select 5 to 6 ft., 11/16 up	\$2.50	\$2.10	\$1.65
4 to 5 ft., 9/16 to 11/16	2.15	1.75	1.40
3 to 4 ft., 7/16 to 9/16	1.75	1.45	1.15

BLACK TARTARIAN

Sweet. Very large, dark red Cherry, becoming black when over-ripe; juicy. Ripens in June.

LAMBERT

Sweet. A fine variety, and one of the largest dark sweet Cherries. Flesh firm; rich, juicy. Tree a strong grower and enormous bearer. Ripens in July.

NAPOLEON

Sweet. Large; pale yellow or red; firm, juicy, sweet and productive. Ripens in July.

SCHMIDT'S BIGARREAU

Sweet. Fruit very large, of deep mahogany color; flesh is tender; very juicy, with a fine, rich flavor. Fruit grows in clusters. An excellent shipper; larger than Black Tartarian, and brings good prices. Ripens in middle to last of June.

BING

This is one of the largest eastern sweet cherries. Fruit dark red almost black when ripe. A fine market variety. Ripens mid July.

WINDSOR

Sweet. Large, liver-colored fruit with remarkably firm flesh of fine quality. Tree hardy and prolific. A valuable late variety. Ripens about first of July.

YELLOW SPANISH

Sweet. Large; pale yellow, with red cheek; flesh firm, juicy, and excellent. One of the best light-colored Cherries. Vigorous and productive. Ripens middle of June.

SOUR CHERRY

MONTMORENCY CHERRY TREES

Large, red and productive. One of the best sour Cherries for commercial planting. Ripens in July. When cherry is fully ripe it is slightly tart. The best sour cherry grown.

Our Montmorency cherry trees are propagated from bearing trees, selected for outstanding qualities, by State College Extension Representatives, Our County Agent and Orchardists of our County.

Two Year Trees

	1-9	10-49	50-99	100-499	500-999	1000 or more
4 - 6 ft., 11/16" up	\$2.25	\$1.85	\$1.30	\$1.00	\$.90	\$.80

2 - 3 ft., 7/16 - 9/16"	1.75	1.45	1.00	.80	.75	.60

Plant Montmorency Cherries for Profit.

Montmorency starts to bear in 2 to 3 years

The number one canning and freezing cherry. This cherry freezes well and can be held one year or more without losing their fresh flavor. Pie bakers and house wife can have fresh cherry pies the year around. The demand for Montmorency cherries is increasing rapidly. This demand for the fruit brings good prices to the growers. There have been yields of two to three tons per acre on ten to fifteen year old trees.

Group of Montmorency Cherry Pickers at one of Adams County Nursery and Fruit Farms Orchards.

PLUMS

	1-9	10-49	50 or more
1 and 2 years old. 4 to 5 feet	\$1.80	\$1.50	\$1.00

METHLEY

A new plum that is rapidly gaining favor due to its fine quality and appearance. Fruit reddish purple with red flesh, very juicy with a distinctive flavor. Fruit medium to large in size.

BURBANK

Cherry-red. Most profitable among growers for market. Ripens 10 to 14 days later than Abundance.

ITALIAN PRUNE (Fellenberg)

A fine commercial plum, dark purple, medium size, juicy, delicious, fine for canning or drying.

SHIROW

A large, sweet, yellow Plum; fine shipper and market sort. Ripens in August.

BRADSHAW

Very large dark violet red, flesh yellowish green, juicy and pleasant. Tree vigorous, erect and productive. Ripens August.

SHROPSHIRE DAMSON

Late, medium size, dark purple, productive. Best plum for preserving.

STANLEY PRUNE

A fine prune type plum, excellent quality, freestone, fruit large in size, dark blue skin, greenish yellow flesh, juicy and fine grained. Heavy bearer. Ripens mid-season. A New York State Experiment Station introduction.

GREEN GAGE

A medium, green fleshed, sweet flavored plum. Flesh turns yellowish when ripe.

PEARS

Prices listed are per tree.

Write for quotations on quantity orders.

BARTLETT

Large; buttery, juicy, high flavored; great bearer. This has long been considered one of the choicest canning varieties. A favorite for all uses. Ripens in August.

GORHAM

A Bartlett type pear of good quality ripening two weeks later than Bartlett. This variety is very resistant to blight.

CLAPP'S FAVORITE

Very large; yellow and dull red skin, with russet specks; flesh melting, rich. Resembles Bartlett very much. Ripens in August.

SECKEL

Small; skin rich yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine-grained, sweet, juicy, melting, buttery. One of the richest and highest flavored Pears. Equally popular for dessert and pickling. Ripens in September.

SHELDON

A large, round, russet and red Pear of very fine quality; melting, rich, and delicious. Tree vigorous, erect and handsome; bears well. Ripens in October.

KIEFFER

Large; handsome Pear with remarkable keeping qualities. Fine for making butter and canning.

BEURRE D'ANJOU

Large; buttery, melting, rich, vinous. The best late fall and early winter Pear. Can be kept in cold storage until late spring.

Budding a block of Apple, Cherry, Plum and Pear Seedlings in Adams County Nursery and Fruit Farms Nursery.

APRICOTS

1 and 2 years old, 4 - 6 ft., \$1.90 each

QUINCES

Prices listed are per tree.

	2 year trees		
		1-9	10-50
4-5 ft.		\$1.75	\$1.50

✓ ORANGE

Fruit large, bright yellow, of excellent quality. Earlier than champion.

✓ CHAMPION

A prolific and constant bearer of oval fruit, averaging larger than Orange and ripening later. A long keeper.

GRAPE STALKS

	Each	3	10	25	50	100
	Vine	Vines	Vines	Vines	Vines	Vines
2 year, No. 1	\$.55	\$1.50	\$4.00	\$8.50	\$14.00	\$22.00

Grape-vines should be planted 6 to 8 feet apart, in rows 8 feet apart.

DELAWARE

This is considered to be one of the highest quality grapes in cultivation. Berries are bright red and firm. The vines are hardy and productive.

CONCORD

The leading market, vineyard, and home-garden variety. Dark blue berries of fine quality.

WORDEN

Resembles Concord but is sweeter, larger in bunch and berry, and a week to ten days earlier than that variety.

FREDONIA

A very promising black grape ripening two weeks earlier than Worden. Clusters are medium and compact, berries are large and round, skin thick and tough, the flesh juicy and very good quality.

NIAGARA

The standard white Grape. It ripens with Concord but the bunches and berries are larger; very sweet.

MOORE'S EARLY

Bunch medium; berry large, round; vine exceedingly hardy. Ripens three weeks ahead of the Concord, making it desirable for early market.

CACO

The new red Grape has a most delicious flavor and is of the highest quality.

CATAWBA

Deep coppery red, becoming purple when ripe, bunches medium, hardy and productive.

RASPBERRIES

Spring shipment only

BLACK

	10	25	50	100	300	500	1000
✓ Cumberland, No. 1 tips	\$1.80	3.30	5.90	9.90	24.30	34.50	60.00

CUMBERLAND

A healthy, vigorous grower, sending up stout, stalky, well-branched canes that produce immense crops of very large, firm black berries. The most profitable market variety of its class. Ripens in mid-season.

RED

✓ Latham, No.1 succor plants	\$2.25	4.10	7.10	12.55	30.35	43.00	75.00
------------------------------	--------	------	------	-------	-------	-------	-------

LATHAM

A new, very hardy, heavy bearing variety. Considered most profitable of the red varieties.

BLACKBERRIES

Spring shipment only

10	25	50	100
\$1.80	\$3.30	\$5.70	\$9.90

ELDORADO

Recommended as the best commercial berry. Jet-black, sweet and pleasant to the taste. Endures the winter well.

ASPARAGUS

Spring shipment only

MARY WASHINGTON

This is considered the best of the Washington strains. Produces heavy crops and is a very profitable variety.

	50	100	250	500	1000
Two year, No. 1	\$3.10	5.00	10.00	15.60	25.00

NUTS

ENGLISH WALNUT

3 to 4 foot trees	\$3.50 Each
2 to 3 foot trees	\$2.50 Each

A fine, lofty growing tree, with handsome, spreading head. It produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home-garden should have an English Walnut tree making nice shade.

CHINESE CHESTNUT (Blight Resistant)

The favorite nut, of many years ago, wiped out by the devastating blight, again returns as a hardy stock resistant to the earlier plague. These trees, of Chinese stock, are quick and prolific bearing, usually producing 3 sweet full flavored nuts to each burr. Fully as delicious as the native American Chestnut, but a little larger in size. Hardy everywhere that peach trees will grow. Trees are very ornamental with attractive glossy, rich green leaves on low-sweeping branches.

	Each	10
3 - 4 foot trees	\$3.00	\$25.00

TERMS

Cash with order, or satisfactory reference. When placing an order for future delivery, send a deposit of 25% with order and balance before date of shipment

Come to the nursery if you can in your car or truck. Make your selection and take the trees with you.

VISITORS WELCOME

Visitors are always welcome. Come and I will be glad to show you around. My many years of experience in growing nursery stock and orchard experience have taught me a lot of things you should know. **No business transacted on Sundays.**

DISEASE FREE STOCK

All nursery stock has been officially inspected by a state inspector and a Certificate of inspection is attached to each shipment.

A Few of the Reasons Why You Should Buy Our Trees

1. We dig our trees in the Spring and do not store them over the Winter.
2. We use Deisel Power to dig our trees. This method gives them an excellent root system.
3. Our trees have been examined and pronounced true to name by leading authorities in Fruit Tree Identification.
4. I have been producing fine fruit trees for the past 45 years.
5. We are located in the largest fruit growing county of Penna.
6. We grow and sell direct from the Nursery to the Planter.

DISTANCES APART FOR PLANTING

Apples	30 to 40 ft. each way	Quinces	8 to 14 ft. each way
Pears	20 to 30 ft. each way	Grapes	8 ft. each way
